#### 1、下载源码

https://github.com/apache/incubator-shardingsphere/archive/4.0.0-RC2.zip

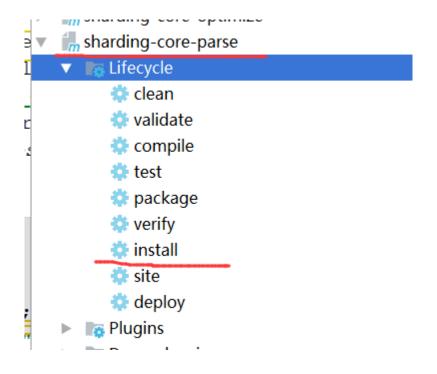

## 2、导入工程到IDEA

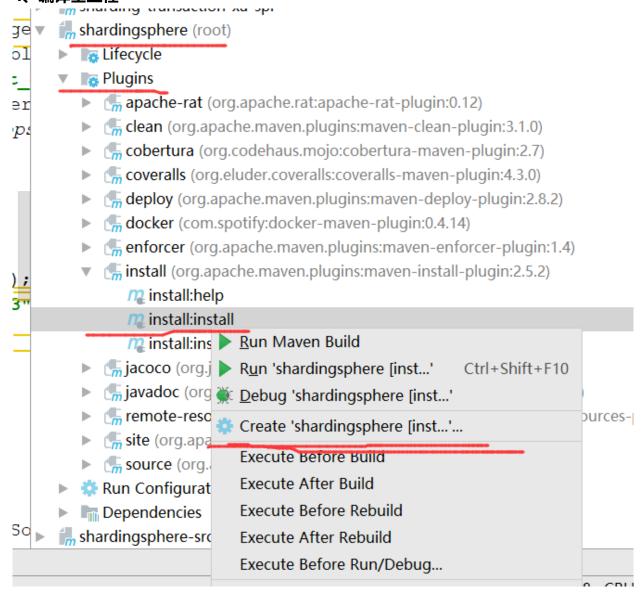

### 3、sharding-core-parse编译

注意先编译此工程是因为:工程内的部分类需要依靠antlr4 SQL解析引擎生成,否则直接编译sharding工程讲报部分类找不到的错误。

编译本工程注意用的是: lifecycle下的install

#### 4、编译全工程

# 注意是用maven-plugin编译,且编译要记得跳过测试部分

Name: shardingsphere [install] (1)		Share	☐ Singl
Parameters General Runner	Logs		
Working <u>d</u> irectory:	D:/GitSource/incubator-shardingsphe	ere-4.0.0-RC2	
Command line:	install -Dmaven.test.skip=true		
Profiles (separated with space):			
	add prefix '-' to disable profile, e.g. "-test"		
Resolve Workspace artifacts			
-111	.ne.maven.piugins.maven-source	-piugiii.2.4)	
🔻 🌼 Run Configu <b>ratio</b> ns	<b>福</b> 译		
shardingsphere [install] (1) (install -Dmaven.test.skip=true)			
► Dependencies		-	

编译时:sharding-sql-test工程会报错,直接忽略即可。

编译完成:运行demo可正常执行则说明编译成功
